STANFORD UNIVERSITY

DEPARTMENT OF BOTANY

STANFORD UNIVERSITY, CALIFORNIA,

June 8, 1923

Professor P. A. Munz,
Pomona College,
Clarmont, California;

My dear Professor Munz:-

I am very glad that you are willing to cooperate in the proposed key to the Flora of Southern California and will be pleased to talk it over with you when you come North. Our latch key is out for you at the home and I hope you will make our place headquarters while you are here.

Would it be feasible to have Johnston collaborate with us or is he too busy with his ~~text book~~ thesis. I expect to write him in a few days about the possibility of contributing the Boraginaceae for the Illustrated Flora. You will be interested to know that the first ~~print~~ volume of the Illustrated Flora was off the press on May 15th and may be had from the Stanford University Press.

Than you for your reprints. Iam especially pleased to have the one from the Fern Bulletin for I had not seen that paper.

Very truly yours,

L R Abrams

Le Roy Abrams,
